

## Presentation of PAT's new products in the US

**Plant Advanced Technologies PAT, presents its 1<sup>st</sup> non-exclusive products at the In-Cosmetics North America on 7<sup>th</sup> and 8<sup>th</sup> September 2016 in New York City.**

Canna Exudactive® and Spiraea Exudactive® are cosmetic natural extracts presenting “detox” and “energizing” claims. These extracts are produced using PAT exclusive PAT plant milking® technology.

New product launches are expected in early 2017. This new development strategy completes the custom-made innovative research activity for exclusive products dedicated to major cosmetic and pharmaceutical industries.

PAT will be at In-Cosmetics North America Show on **stand D30**
