

Activity progress in the first half of the year 2018

In thousands of euros	2018/06/30	2017/06/30	2017/12/31
Turnover*	323**	174	805

* The turnover does not include the subsidiaries StratiCell, Temisis (100% subsidiaries), PAT Zerbaz (99% subsidiary) and Couleurs de Plantes (51% subsidiary). ** Unaudited figures

Plant Advanced Technologies PAT, a specialist in rare plant biomolecules, recorded first-half sales of € 323,000, an increase of 85% compared to last year. This growth is driven by the increase in sales of molecules related to the launch of a new cosmetics range of a customer.

Although the turnover of the first semester is historically not significant for PAT, this trend confirms the customers interest for the products developed by PAT.

As a reminder, revenues from ongoing R & D contracts are not recognized in the half-year sales in accordance with French accounting standards. These will be added to the sales of molecules at the end of the year.

PAT plans to launch new products in the second half of 2018, which will contribute to the development of its business.
